Professional Summary

Computer Science Engineering student passionate about Artificial Intelligence, Machine Learning, and Generative AI. Skilled in Python, NumPy, Pandas, Matplotlib, Scikit-learn, SQL, Git, GitHub, FastAPI, and data analysis. Actively building projects and documenting my AI learning journey.

Education

B.E. in Computer Science Engineering
Sir M. Visvesvaraya College of Engineering
2024 – Present

Technical Skills

Python, SQL, NumPy, Pandas, Matplotlib, Scikit-learn, Git, GitHub, Jupyter Notebook, VS Code, FastAPI, Flutter, Firebase, Machine Learning, Data Analysis

Projects

AI Engineer Journey

Public GitHub repository documenting daily AI/ML learning, hands-on practice, notes, and implementations.

Bank Fraud Detection System

Built an ML model to detect fraudulent transactions using preprocessing, feature engineering, and model evaluation.

Iris Flower Classification

Developed a classification model using Scikit-learn to predict iris flower species.

Experience

Part-Time Coding Tutor (2024 – Present)

Teach programming fundamentals, conduct doubt-solving sessions, and prepare study material for beginners.

Certifications

- Machine Learning Internship (MSME)
- NPTEL (Relevant Coursework)
- Rinex Training
- Placemantra Program
